

One platform. Every field operation.

Collection management • Live GPS • Driver app
Evidence library • Warehouse weights • Analytics

Commercial software demonstration

Illustrative interface views; synthetic sample data

From fragmented work to one auditable workflow

Stop managing collection operations across disconnected calls, spreadsheets, and driver updates.

01

Requests get lost

Phone messages and separate sheets make it harder to see what is pending.

02

Dispatch is reactive

Managers need visibility of where drivers and open jobs are.

03

Proof is scattered

Photos and service records are difficult to retrieve after the event.

04

Reporting is delayed

Weights, performance and expenses are not available in one view.

THE ANSWER: A SINGLE SYSTEM OF RECORD — FROM FIRST REQUEST TO FINAL EVIDENCE

Eight capabilities. One connected operating system.

A modular, mobile-friendly platform with the same underlying job and activity records.

01

Request intake

Website, staff messaging and booking records

02

Smart dispatch

Zones, daily assignments, transfer & bulk upload

03

Live fleet view

Current driver locations and job status map

04

Driver application

Navigation, job outcomes & field communication

05

Digital evidence

Photo/video proof associated with jobs

06

Warehouse ledger

Bag numbers, dates & recorded kilogram totals

07

Insights & reporting

Performance KPIs, trends and downloadable reports

08

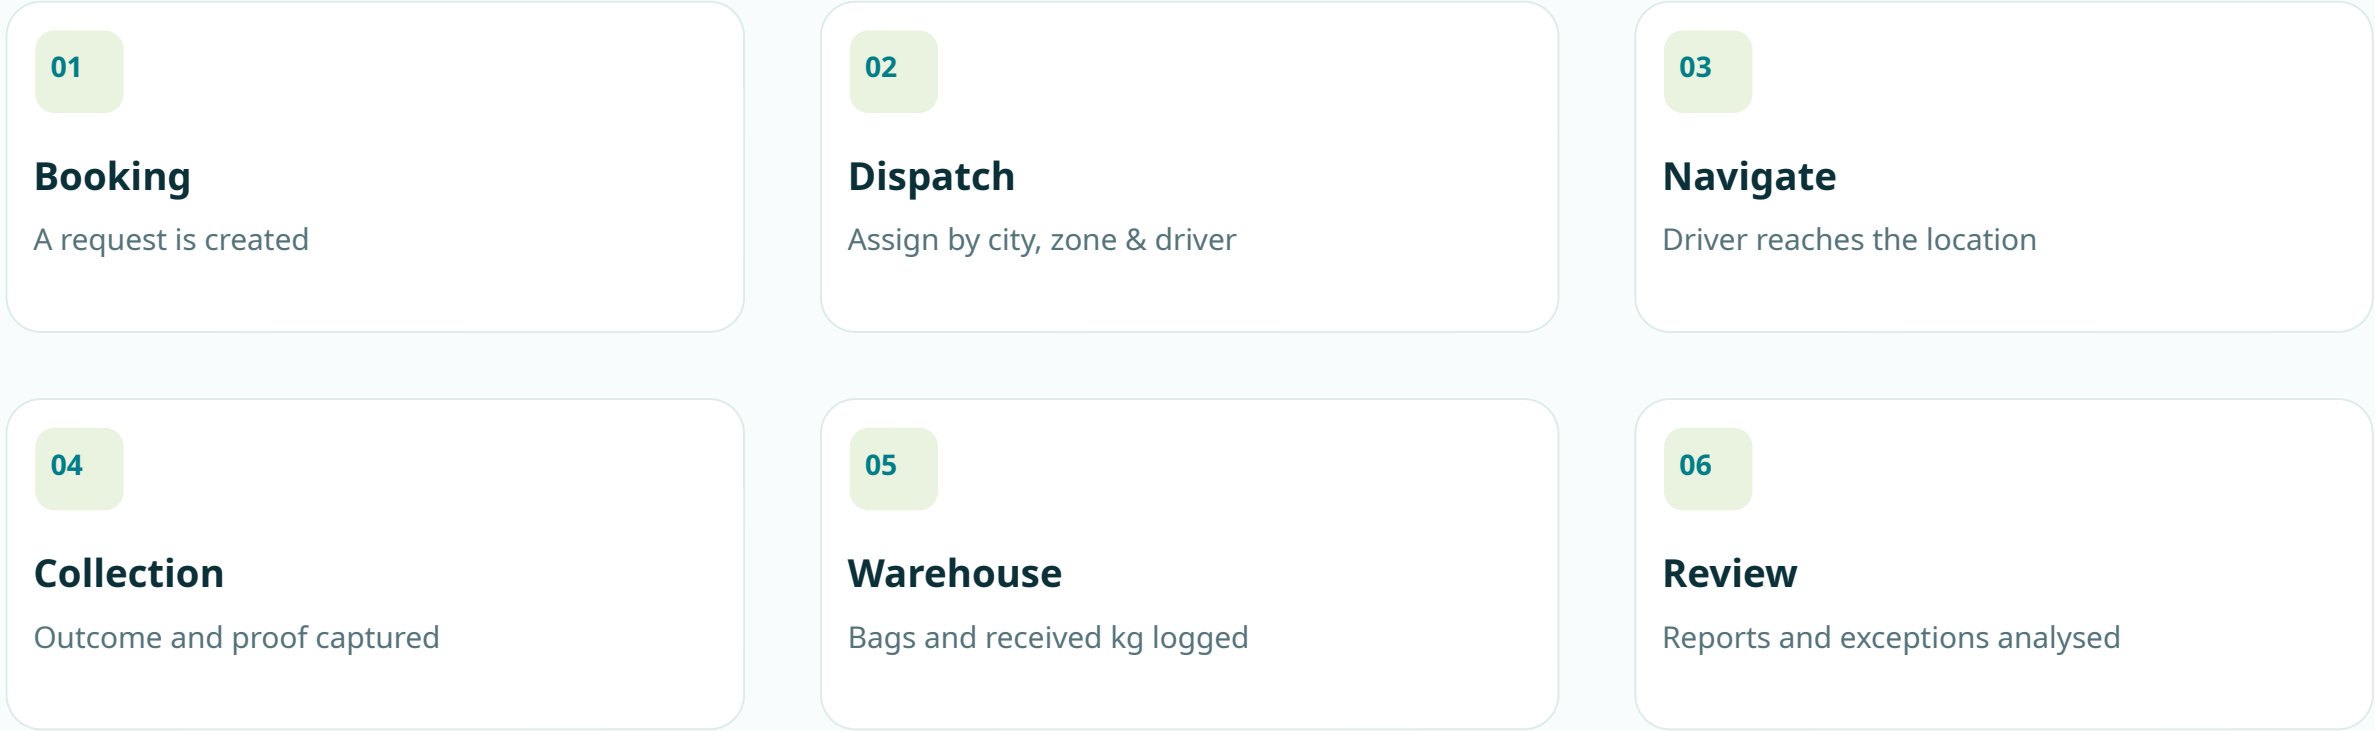

Financial controls

Expenses, cash, advances and accounting records

Modules can be configured to an organization's workflow and permissions.

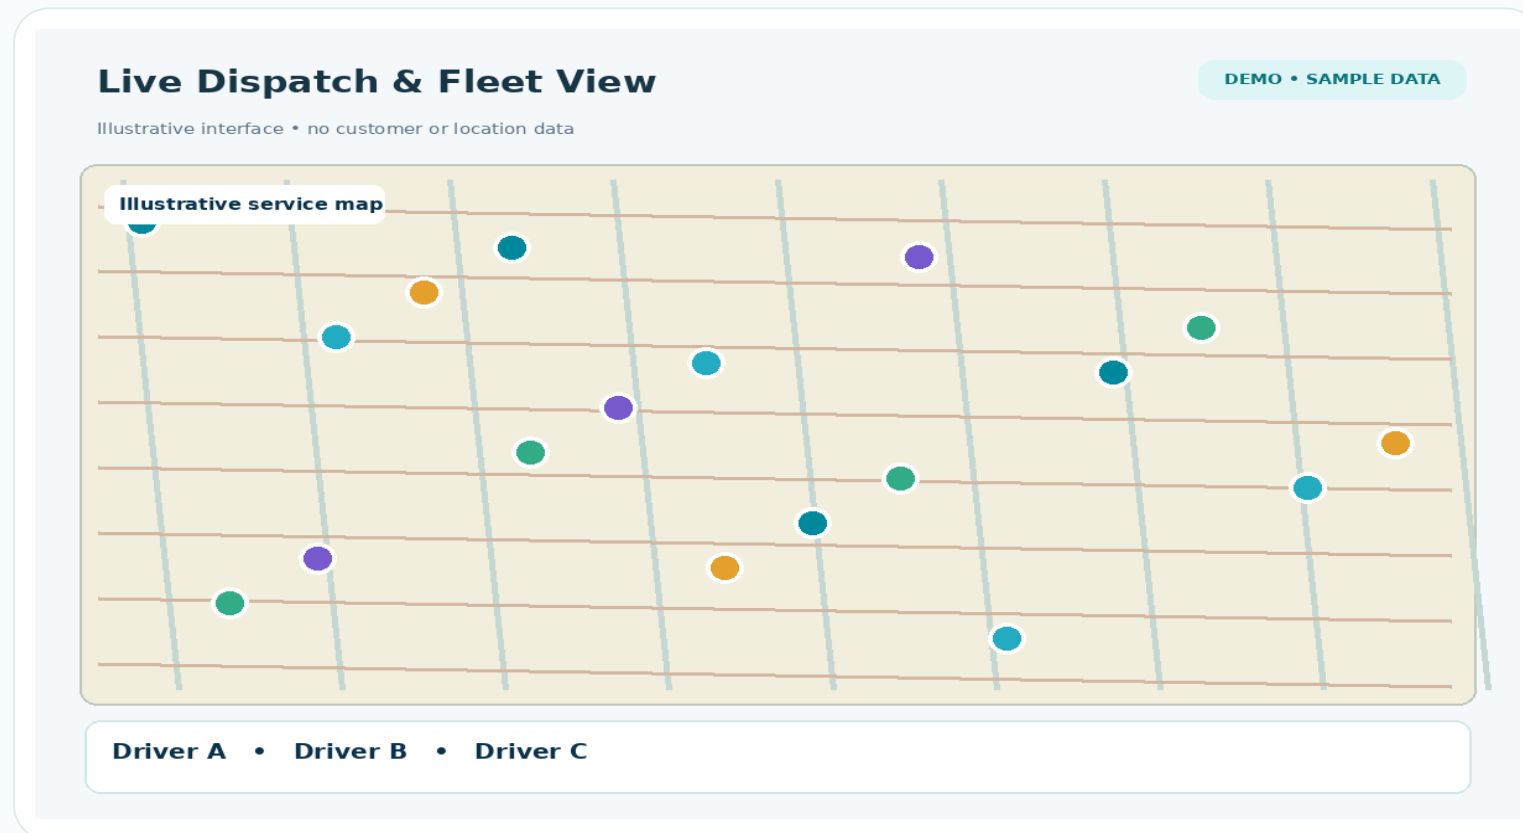

From request to verified operational record

Every handoff is visible to authorized staff, with an audit trail of service activity.

See the operation, not just its status.

A unified live map shows drivers, collection jobs, and location-based workload.

COMMAND CENTER

Live GPS

Driver positions and connection status

Jobs on map

Assigned, completed, pending & upcoming

Daily visibility

Driver counts and service progress

Deployment built around where the work happens

Organize incoming requests by city, neighborhood and assigned field team.

Geo-aware coordination

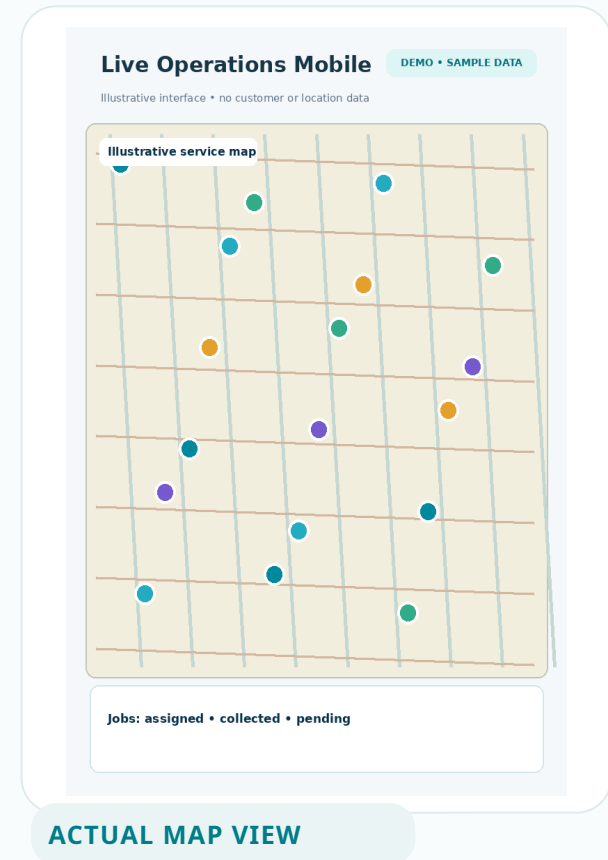

Group tasks by service area and driver assignment.

Live reassignment

Move unfinished tasks between drivers as plans change.

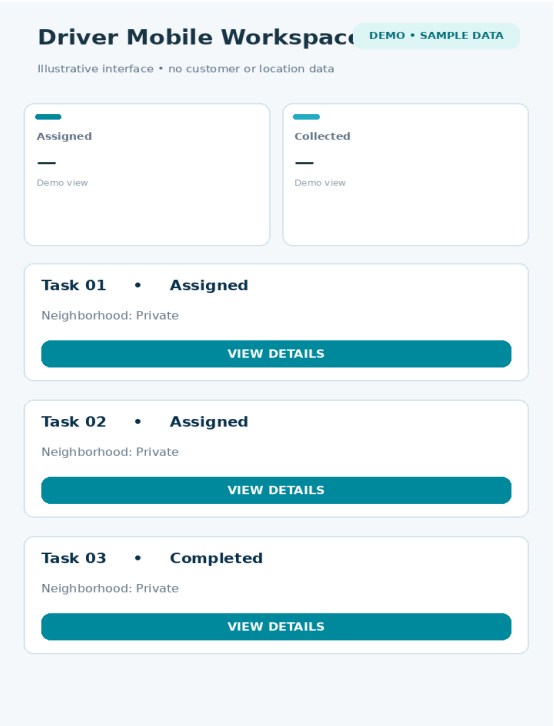

Flexible intake

Support staff-entered requests and structured lead queues.

Give the field team a focused mobile workspace.

Drivers can act on assigned jobs with navigation, status updates and evidence submission.

- 01

See today's tasks

Assigned jobs, customer area and job context.
- 02

Navigate & contact

Call or open navigation from the job.
- 03

Record outcomes

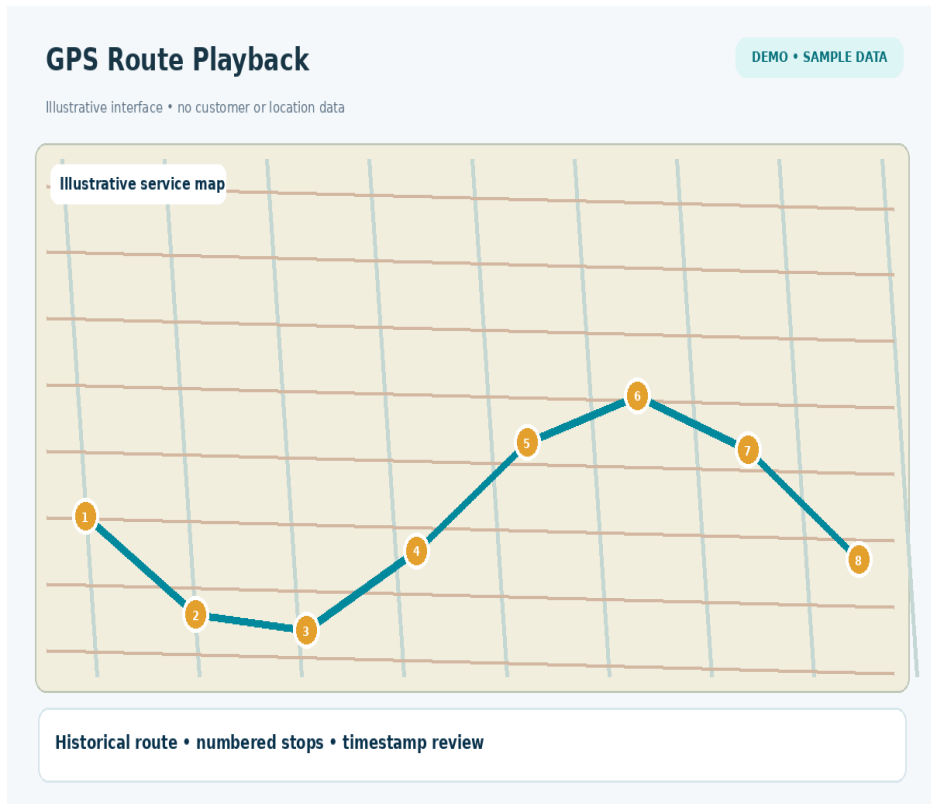

Collected, postponed, cancelled or no response.
- 04

Upload proof

Capture collection photos or videos from the phone.

Reconstruct the route taken — not only the last location.

Review historical travel traces and collection stops for supervision, troubleshooting and service quality.

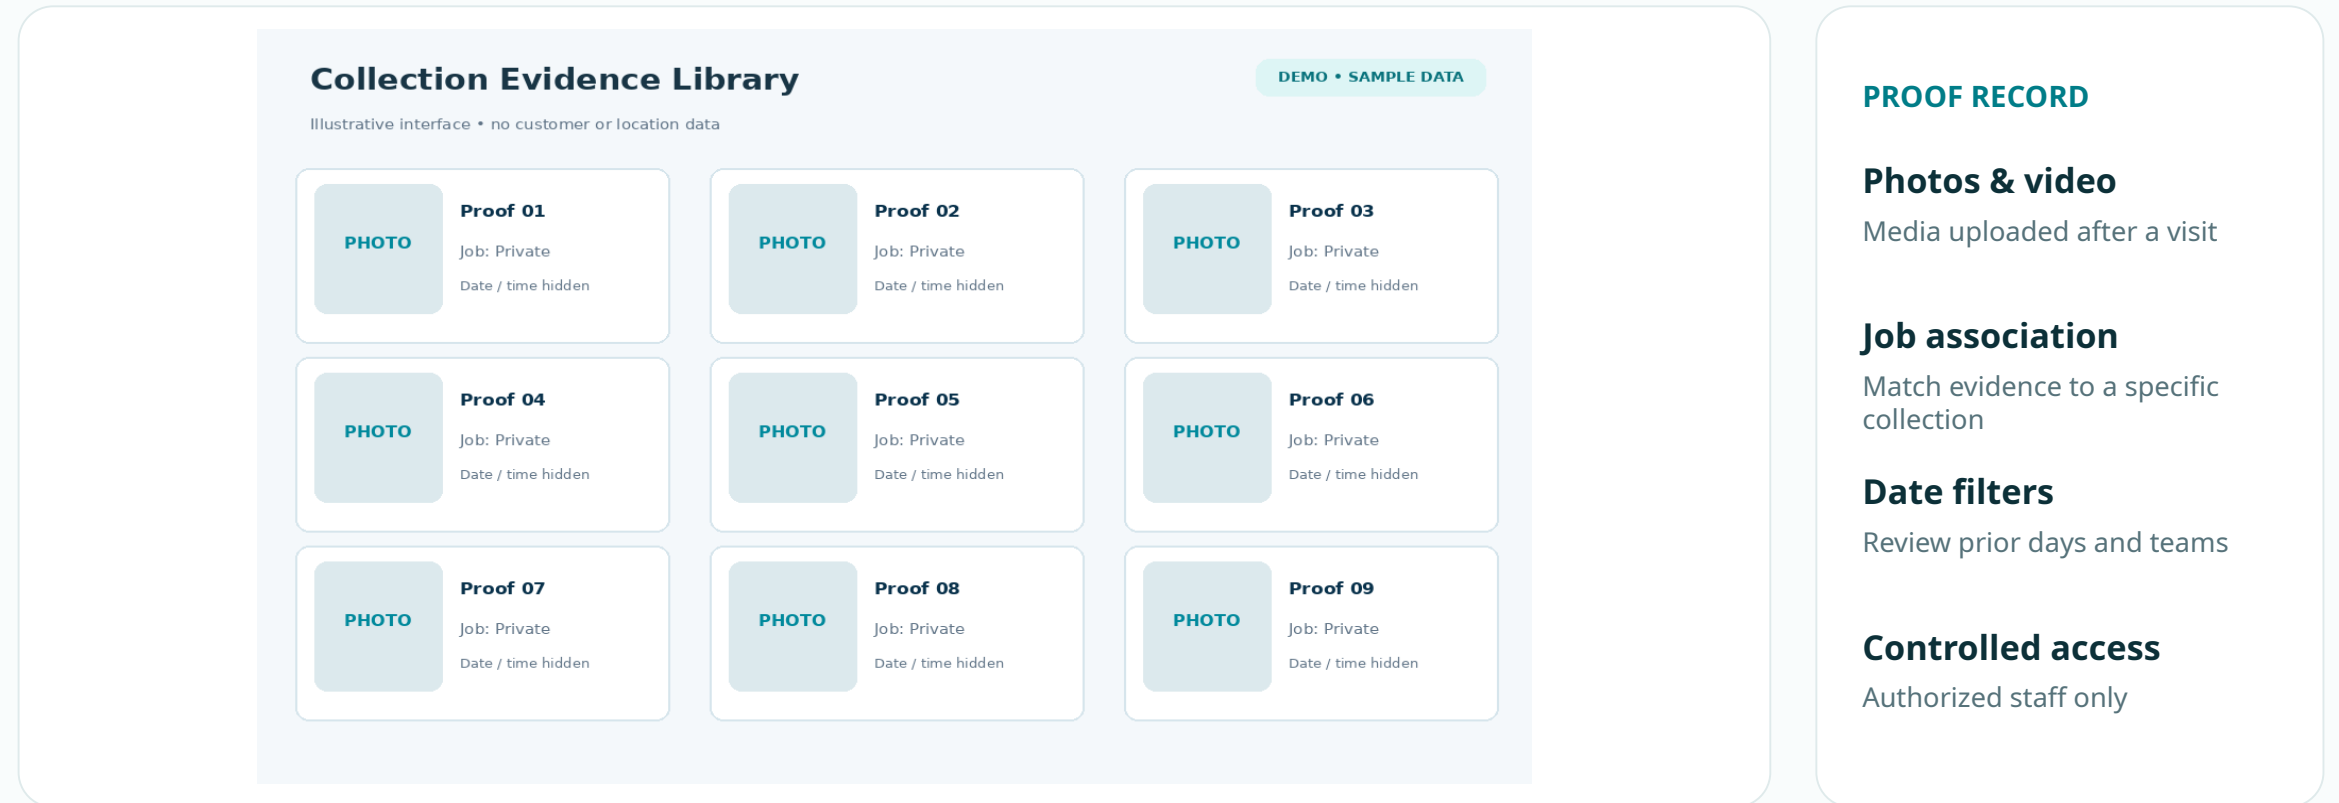

ROUTE REVIEW

- 01 Select a driver
- 02 Choose the service date
- 03 Review timestamped GPS points
- 04 Inspect stops & proof

GPS history depends on device permissions, signal and connectivity.

Every collection can have photographic evidence.

Build confidence with a searchable Evidence Library instead of scattered personal-phone images.

Illustrative evidence-library design; private details removed for marketing.

Make collection quantities visible in kilograms.

Log numbered bags, intake dates and weights — with printable or downloadable records.

Warehouse Intake

Warehouse accountability Bag register • kilograms • daily totals • CSV / PDF

Performance, trends and productivity at a glance.

Decision-ready dashboards turn operational activity into measurable service indicators.

EXAMPLE KPIs

- Requests**
Demand, by day & location
- Completions**
Finished jobs and outcome rates
- Neighborhoods**
Areas with highest pickup activity

Team performance
Comparative driver workload

Excel/CSV imports, task transfers and flexible scheduling

When collection volume grows, administrators should not need to re-enter every request.

Bulk Assignment

Illustrative interface • no customer or location data

DEMO • SAMPLE DATA

Task Transfer

Illustrative interface • no customer or location data

DEMO • SAMPLE DATA

Move open tasks

From: Driver A

Tasks selected: —

To: Driver B

Reason: Service coverage

CONFIRM TRANSFER

Bulk assignment

Upload job lists from Excel / CSV.

Transfer jobs

Reallocate open tasks to another driver.

Prevent duplicates

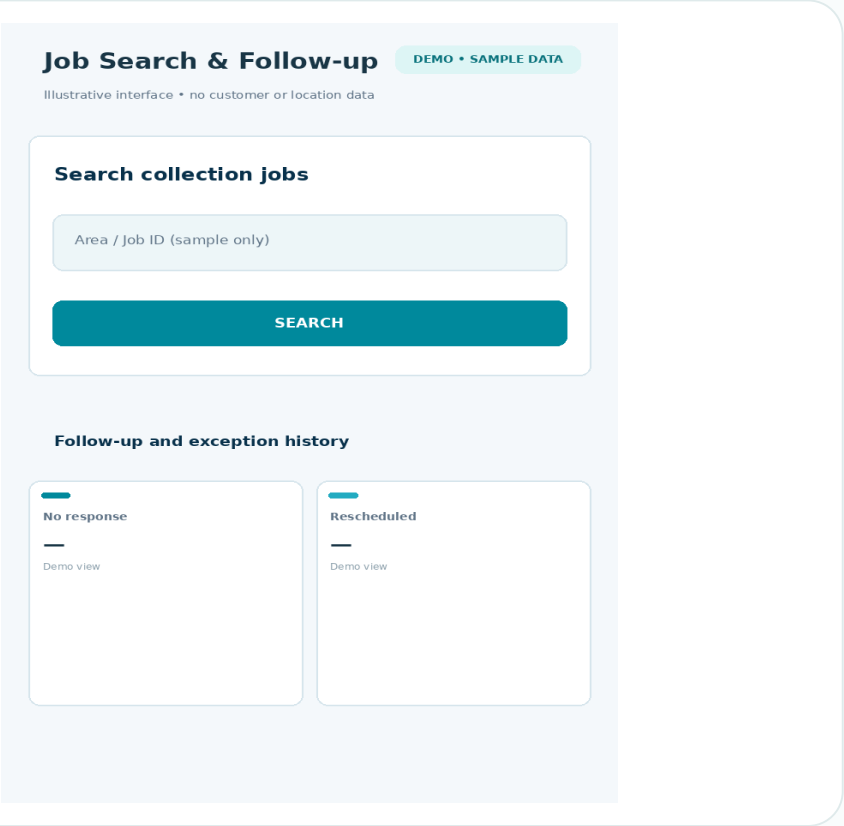

Review import rows before committing.

Planned collections

Support scheduled or postponed service dates.

Not every attempt succeeds. Every exception stays actionable.

Find records quickly, follow up on no-answer visits, and keep the service queue moving.

01

Search by area or phone

Locate open and historical jobs without scanning multiple files.

02

Follow up on no-response visits

Reopen, reschedule, or reassign follow-up requests.

03

Track exceptions

Preserve postponed, cancelled and unresolved outcomes.

Operational expenses and administrative controls, together.

An integrated accounts module supports day-to-day records and clearer financial oversight.

Operational Finance

Expense recording

Operational and driver expenses.

Cash handling

Petty cash, receipts and transactions.

Advances & balances

Documented payments and staff-related records.

Permission-aware workflow

Authorized accounts, approvals and correction history.

Financial values in the demonstration are deliberately hidden.

FIELD OPERATIONS PLATFORM / PRIVATE SOFTWARE SHOWCASE

14 / 16

Built for multiple teams, locations and brands.

White-label software can be configured around each customer's operational model.

01

Multi-location

City and team views can be managed from one platform.

02

Arabic + English

Localized interfaces for management and field teams.

03

Permission controls

Staff access can be assigned to relevant roles and locations.

04

Mobile + desktop

Management views and driver tools designed for daily use.

DEMONSTRATION OF MULTI-LOCATION FIELD OPERATIONS • CLIENT AND OPERATOR IDENTITIES WITHHELD

TAILORED TO YOUR ORGANIZATION

Your operations. Your brand. One system.

A configurable platform for collection logistics, field-service execution and measurable operational oversight.
